

My name is Joseph Romo, I live in Nipomo, and I support the rail extension project. I have two loving and caring parents that taught me what it means to work hard and make a good living.

My mother taught me compassion, while my father taught me responsibility, and I feel as if they did a good job.

And these people who are against the project , who drive in their cars are high and mighty hypocrites, , who pretend as if they know what's best for the community and try to act like all of our parents.

They scare us into thinking that we're all going to be killed in our sleep due to toxins in the air and try to make us feel guilty for driving cars to work.

It's ridiculous, all of these people are retired, bored and miss being able to boss their children around, so they pick up hobbies like these to come in here and boss us around. They're using these lies to scare us into doing what they want.

To be completely honest, I believe that this project is a no brainer. It safe, it's low impact, it keeps the business for our county, and provides a product that we all use, provides jobs and supports a significant portion of the tax base.

So don't indulge in these desperate, wannbe parents and let us do what's best for our jobs and teaching our kids how to work hard.

Thank you.
